

PARENTING IN THE DIGITAL WORLD

The cyber safety seminar for parents, *Parenting in the Digital World*, is a 90-minute, engaging and eye-opening presentation about what is really going on in our children's digital world.

- Up to date content
- Tools and resources
- Taught in English and Spanish
- Can be presented in-person, webinar, or view-on-demand.

Based on Clay Cranford's acclaimed book, *Parenting in the Digital World*, this 90-minute seminar will prepare parents to effectively supervise their child on social media sites, protect them from online threats, and bring technological balance back to their homes. The presentation is taught by law enforcement officers and educators who have extensive experience working with children and who are parents too.

Our aim is to leave the audience feeling empowered to take control of their child's technology, set rules and boundaries in their home and work hand in hand with teachers and educators. Every audience member, regardless of technological experience, will walk away with simple, powerful and effective messages.

What parents and educators are saying about our program

Every parent should be required to attend his presentation! I learned so much in the time there and walked away feeling more informed and confident in having a solid game plan to protect my kids.

- Nani L., Parent

This was the best parent education night I have seen in my 30 years as an educator and administrator.

- Michelle Wrenn Benham, Principal, Vista del Mar Middle School.

I was so happy I was able to attend...the information shared with us transformed my sense of powerlessness to a certainty that there are concrete steps I can take as a parent of this generation to protect my family.

- Jenny O., Parent
